**Subject:** Greenhouse Peppers (2011-1-1)

Dave – I haven't had any additional information come in this week regarding your request for greenhouse pepper production information. What I did find is that:

1. There is no greenhouse pepper production in Alaska, Idaho, Utah, or Montana.
2. The one person in Washington I heard from reported growing 400 square feet of peppers last year. They hope to double that this year.
3. I have not received any information on greenhouse pepper production for Oregon.
